

EARLY ADOPTERS OF .ART

From London to Los Angeles, Beijing to Berlin, Moscow to Paris, the world's cultural hotspots are embracing **.ART**. And we are working hard to welcome people and organisations from every artistic discipline from abstract art to performance, music to publishing.

Early Adopters include some of the world's most influential and respected museums, galleries, artists, art fairs, art foundations and media organisations. Some are completely migrating their website to a **.ART** domain while others are using a **.ART** address for an exciting, unique content. Some are using **.ART** domains to promote forthcoming exhibitions and projects while others are selling merchandise.

What unites them is the strong and simple identity that a **.ART** domain affords: an address that says 'I firmly belong in the art world'. We are excited and proud to see all our Early Adopters grow their digital presence through **.ART**.
